Superfund homepage 

I don't have any concerns about it. It seems that Betty W has some. I
knew Karen P was passing the info up and that HQ had interest.

I don't see what harm it will do.

Greg and Susan,

Looks like the Delfasco Forge site is being picked up by Office of Superfund

Remediation & Technology Innovation to be features on their website.

Can you call or email Melissa Greer with more information about Delfasco, etc. and hopefully with newer pictures of solar panels installed to power fans?

Thanks!!!

Karen

PS Yeah!!!! It is good to get some attention for your creativity and hard work!!!!

Subject Grand Prairie Solar-powered fan story for Superfund homepage

Hi Karen,

Melissa Friedland and Suzanne Wells forwarded me your email concerning the use of solar-powered fan systems to mitigate vapor intrusion at homes near the former Delfasco Forge Site. We would like to feature this story in a news article for the Superfund homepage, to be posted sometime in early 2009. I have attached a first draft of the news article, and I would appreciate any comments or additional information you can offer. Specifically, I was wondering what type of site Delfasco is; I can't seem to find it listed on the NPL, or in CERCLIS. Also, do you know what is the pay-back period for the fans? The picture included is from your memo, but feel free to offer up a different one if you prefer.

If you are not the contact person for this article, please let me know who is the correct person to speak to.

Thank you,

Melissa Greer
